

Coatings, Sealants & Paints

Tire-derived coatings, sealants and paints provide enhanced durability , flexibility and protection from moisture and the elements. The products are used in diverse applications, from building construction to automotive protection.

Coatings, Sealants & Paints Benefits May Include:

- Extend the lifetime of treated products and surfaces
- Superior UV resistance, heat resistance and low temperature flexibility
- Excellent adhesion to wet, moist or uneven surfaces
- Withstands exposure to chlorides, sulfates, UV, abrasion and freeze-thaw cycles
- Resistant to oils and solvents
- Appropriate for a variety of indoor and outdoor applications
- Available in a range of different colors
- Easy application and maintenance
- Cost-Effective

Coatings, Sealants & Paints Applications May Include:

- Waterproofing and protection for truck bedliners and underbody protection
- Sealants used to enhance tire performance, safety and longevity
- Infrastructure coatings to seal or patch cracks or leaks
- Waterproofing coatings for:
 - Fixed features such as fountains, pools, spillways and aquatic tanks
 - Planter boxes and foundations
 - Concrete, masonry and other construction materials
 - Decks and pedestrian bridges
 - Water and wastewater facilities
- Waterproofing membranes for:
 - Roofing underlayment
 - Chimney, window and wall flashing
 - Deck systems and concrete foundations
